

CEROIL ACTICIDE® CMG

Anti-bacteria for diesel

PRODUCT

ACTICIDE® CMG is a solvent-based biocide, mixture of chloromethyl / methyl isothiazolinone in glycol, recommended for non-aqueous systems or with low water content, susceptible to microbiological contamination. ACTICIDE® CMG exhibits good anticorrosive properties and provides protection against microbiological degradation, in addition to preventing the formation of residues in tanks and refineries.

- **Maintenance dose: 0,01% → 1L for 10.000L**
- **Shock Dose: 0,40% → 1L for 250L**

APPLICATION

ACTICIDE® CMG is compatible with most of the formulations in which its application is recommended. However, as there are a wide variety of possible applications, before use it is recommended to carry out internal tests of stability and compatibility of the active ingredients with the formulation, as well as to evaluate any effect on the properties of the product during manufacture, storage, transport and in your application. The use of oxidizing, reducing and nucleophilic agents that negatively affect the stability of the biocide should be avoided.

In case of products sensitive to discoloration, it is recommended to check the color stability. It is always advisable to carry out previous compatibility tests to check possible changes in the chemical and physical properties (color stability, viscosity, odor), as well as the effect of external factors (pH, humidity, temperature, UV radiation) in each formulation. in particular.

Before use, **ACTICIDE® CMG** must not be diluted or mixed with other raw materials to avoid negative influences on its assets.

Available in various formats:

Reference	Capacity	Un. Box
C00056CNA	100 ml.	20
C00056FNA	500 ml.	12
C00056HNA	1 L.	12
C00056JNA	5 L.	4
C00056KNA	25 L.	-
