

CEROIL WINTER DIESEL

Antifreeze for diesel

Revision date: 15/03/2022

Page 1 de 1

PRODUCT

Additive that enhances the fluidity of cold diesel: extends the range of use of diesel, lowering its freezing temperature and delaying the appearance of crystals in the diesel that clog the filter and prevent the engine from starting. Special additive to reduce the freezing temperature of diesel.

USEFULNESS

In all types of motor vehicles equipped with diesel engines. As well as in buses, trucks, agricultural machinery and public works, etc.

DOSE

Add the recommended dose directly to the fuel tank. EA rocking for a few minutes.
