

CEROIL DIESEL POWER

Diesel Booster

PRODUCT

Diesel conditioning treatment, which increases the cetane number (flammability index of diesel) depending on the concentration applied. The effects of this treatment improve combustion and considerably reduce particulate emissions and opacity in diesel engines. It is effective for all types of diesel fuel and avoids the use of higher priced commercial diesel fuels created by the oil companies to solve the current problems of modern engines.

UTILITY

Automotive, marine, fleets, tanks and heating systems.

ADVANTAGES

- Suitable for Diesel.
- Increases the cetane number
- The increase will depend on the concentration applied.
- Prevents the formation of residues by low cetane number diesel fuels.
- Improves cold starting.
- Improves engine power and response.
- Reduces emissions by up to 50%.
- Stabilises idling and eliminates jerks.
- Does not damage catalytic converters.
- Absorbs water and reduces diesel freezing.
- Compatible with other types of additives.

APPLICATION

Minimum proportion (normal use):
0,2% - 100 ml. Para 50 L. of fuel.

Maximum proportion:
0,4% - 200 ml. Para 50 L. of fuel.

Reference	Capacity	Unit Box
CO0046BAC	200 ml.	12
CO0046HAC	1 L.	12
CO0046JAC	5 L.	4
CO0046KAC	25 L.	-

- 200ml. and 1L. Aluminium Container
- 5L. and 25L. Carafe
