

Regenerates joints and eliminates leaks

## PRODUCT

Oil-soluble additive to regenerate the joints and seals of the change, restoring the tightness. Avoid oil stains under the vehicle. It prevents dry clutches from receiving oil particles and insufficient lubrication of the transmission, as well as preventing possible damage to the transmission due to a low oil level. Prevents oil stains harmful to the environment.

## USEFULNESS

Suitable for all types of mechanical transmission boxes, differential and secondary gears. Do not apply in automatic transmissions or wet clutches.

### 58J 5NH5; ES

- ✓ Stops oil losses in shifts and leaking transmissions.
- ✓ Regenerates and softens hardened packings.
- ✓ No more oil stains are produced that damage the environment.
- ✓ Protects clutches from oil leaks, prevents lubrication deficiencies and transmission damage due to low oil level.
- ✓ For mechanical transmissions and differentials.
- ✓ Not suitable for automatic transmissions

Available in 200ml aluminium container

### 8CSE

A dose of 200 ml. is enough for up to 4 L. of oil.
