

PRODUCT

Colorless coolant, formulated without glycol and with anti-corrosion additives with demineralized H2O base. Aluminum bottle.

UTILITY

Specially developed for racing use on asphalt with cars and motorcycles of all specialties that allow its use in the regulation.

ADVANTAGES

- Formulated without glycol.
- Does not slip in contact with the asphalt.
- High heat transmitting qualities.
- Reduces engine working temperature.
- Great anticorrosion power.
- Does not attack joints or seals.
- It prevents the crystallization
- Dilutes calcifications and residues

APPLICATION

SHAKE BEFORE USING

- Pour the content into the cooling system, preferably with the engine at room temperature.
- Direct use.
- It is not necessary to dilute.

Available in 1L, 5L y 25L.
